Cleveland, OH 44131

Dear Randy,

I wanted to drop you a quick note to discuss the success we have achieved with Acuity's Video Capture surveillance system at Wadsworth City School District.

As you know, safety of our children at the Wadsworth School District is a top priority. In addition, we have always taken pride in our ability to maximize our technology dollars to remain on the cutting edge of educational and computer innovation. Acuity's product has enabled us to provide a superior security solution that protects our students and faculty, while also being the most cost effective system available.

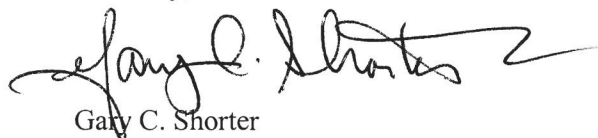

When looking for replacement technology for our aging analog video security system, we considered other highly visible products in the industry. In fact, we were about to purchase another system until I saw the VCS's capabilities at the Ohio SchoolNet Conference. Only Acuity's VCS system offered a non-proprietary industry standard solution that took advantage of our existing network. We were able to cost effectively obtain a state of the art video surveillance system that is second to none. In fact, utilizing the VCS's networking capabilities, we were able to purchase one VCS system that is capable of being used throughout our entire school district, rather than other products that required one or more systems at each location to accomplish the same goal.

I recommend the VCS to any school district that is interested in maximizing its technology dollars while not compromising quality.

I would also like to commend you and your staff for your effort and attention to detail throughout our implementation process. Whenever we select a new company to provide a critical service, our administration is concerned that all promised services are delivered. Acuity's service and response actually exceeded our expectations during and after our implementation.

Thank you again for your continued commitment to our success. We would welcome a visit from any other school system that is interested in seeing our VCS solution in person.

Sincerely,

Gary C. Shorter
Director of Technology
Wadsworth City Schools
Wadsworth, Ohio
